V-VR

VAGINAL REJUVENATION FROM SYMPTOMATIC TO SENSATIONAL

VIORA *Life*

Now GET THE HIGHLY SAFE, CLINICALLY-PROVEN, AND PROPRIETARY TREATMENT WOMEN AROUND THE GLOBE TRUST TO IMPROVE BOTH THEIR AESTHETIC AND MEDICAL VAGINAL CONCERNS WITHOUT SURGERY, DOWNTIME, OR DISCOMFORT.

Every woman will experience vaginal changes during the different seasons their life, including their childbearing years, pre- and post-menopause, following significant weight loss, and naturally as they age. As these changes occur, many women suffer in silence through some very common symptoms—often feeling alone, uncomfortable discussing their challenges, and under-confident about their overall feminine well-being.

These symptoms, which at some point every woman is likely to share, can take a physical and emotional toll—and can lead to a diminished quality of life.

V-VR treatment—a safe, innovative, and non-surgical radiofrequency procedure which has been used to treat thousands of women across the globe—is an effective new therapy to address many of the concerns women have regarding their feminine wellness through any stage of life.

Whether your concerns are symptomatic, sensational, or superficial (cosmetic), return your vitality with V-VR. Explore how this treatment can get you back to the life you love, and feeling your most confident and empowered self...

I was very surprised how fast I felt the difference after the treatment because the treatment was not painful at all and very short. I felt great relief in the dryness and the itching sensation.

—T.G., AGE 77

VIORA *Life*

V-VR YOUR QUESTIONS ANSWERED

- **What is a V-VR treatment?**

V-VR is the only non-invasive device that combines the use of two advanced technologies (Co-Polar™ and CORE™), along with a thoughtfully designed handpiece, to precisely deliver radiofrequency energy—gently and safely heating vaginal tissue to address a wide range of women's vaginal health concerns.

- **How does V-VR work?**

The radiofrequency energy gently heats the vaginal tissue, leading to increased blood microcirculation and increased vaginal elasticity of the connective tissue by stimulating collagen and elastin and increasing vaginal lubrication.

- **What can be treated with V-VR?**

V-VR can be used to treat the aesthetics concerns associated with vaginal rejuvenation, as well as more symptomatic (medical) and sensational (sexual) conditions that can effect overall quality of life.

- **How long do treatments take?**

V-VR treatments are among the most rapid of all Vaginal Rejuvenation treatments. Depending upon symptoms being addressed, your sessions will last between 16 and 20 minutes.

- **How many sessions are needed?**

Each treatment course depends upon the specific symptoms that are being addressed. On average, the recommended treatment course is 3 sessions at a 4 week interval.

- **Is the V-VR treatment safe?**

With unprecedented safety features and the unique combination of two patented RF technologies, V-VR is able to deliver one of the safest and most effective energy based Vaginal Rejuvenation treatments available worldwide.

- **Is the treatment painful? Or how it feels?**

Thanks to the controlled RF energy delivery, the V-VR treatment is pain free. The ergonomically designed handpiece offers patients a smooth and comfortable glide application.

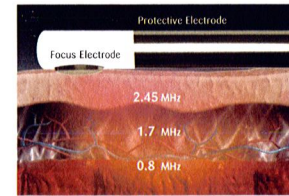

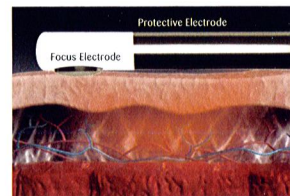

- **Following a treatment when can I resume my daily activities?**

V-VR treatments are completely non-invasive with no anesthesia necessary. There is no downtime at all.

UNMATCHED SAFETY WITH TWO PROPRIETARY TECHNOLOGIES

Co-Polar™ technology has the benefit of delivering RF energy with precision control—preventing the chance of any unexpected pain or discomfort.

CORE™ technology allows your provider to deliver RF energy at controlled depths to treat your specific concerns—from superficial to the deep vaginal muscle layer.

RESHAPING QUALITY OF LIFE

In menopause, I didn't feel as alive... as youthful or vital. With the V-VR, I noticed my body feeling more youthful. I wasn't as dry. I felt more healthy. I felt more attraction. And, I really enjoy this aspect. There were no side effects. The procedure was simple.

—CAROL, AGE 58
